DETAILED ACTION

Election/Restrictions

1. Applicant's election of Species I in the reply filed on 2/7/06 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Priority

2. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Information Disclosure Statement

3. The IDS, filed 7/11/03, has been considered in full.

Drawings

4. The drawings, as originally filed, are acceptable as formal.

Claim Objections

5. Claim 1 is objected to because of the following informalities: In claim 1, line 4, "each parts" should be re-worded for clarity. Appropriate correction is required.

Claim Rejections - 35 USC § 112

6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

Art Unit: 3682

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

7. Claims 1-3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1, "like a bowl" is indefinite since it is not clear if the bowl shape is required.

Claims 1 (2 places) and 3 (1 place), the language e.g. "for communicating the oil passage and the inside of the crankcase" is indefinite since the term "communicating" is not clear.

Claim 2, it is not clear how the oil strainer can be "on" an oil passage.

Claim Rejections - 35 USC § 102

8. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

9. Claims 1-2 are rejected under 35 U.S.C. 102(b) as being anticipated by Freese, V (6,058,898).

Freese shows the claimed invention where an oil pan structure has a swelled portion (as at 44) which provides cooling to the engine oil via a heat exchanger (64, 66, 68); the oil is cooled via engine coolant through passages (74), the swelled portion also having a removable cover (72), the oil pick-up passage may employ a strainer.

the body 24 also includes an oil pick up passage 52 formed integrally therewith and providing fluid communication between the reservoir 26

Art Unit: 3682

and the engine 10 through the flanged lip 38. The pick up passage 52 has an inlet 54 formed in the bottom 28 of the reservoir 26 and at least one outlet 56 formed in the flanged lip 38 of the body 24. A strainer may also be employed at the inlet 54 to the pick up passage 52 to further filter the oil flowing through the lubrication system of the engine 10.

Allowable Subject Matter

10. Claim 3 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion

11. The following are suggested formats for either a Certificate of Mailing or Certificate of Transmission under 37 CFR 1.8(a).
